

BRANDT Manni-Plex® Fe

# Build Stronger, Healthier Turf and Ornamentals

Applying the right combination of nutrients produces outstanding greens, tees and ornamentals. BRANDT MANNI-PLEX foliar nutrients were designed to deliver nutrition quickly and efficiently. Their small molecular size and weight helps get more nutrition into the plant for better results.

## Key Benefits of BRANDT MANNI-PLEX Fe

### Efficiency

- Quickly supplies readily available N and Fe to turf and plants
- Proprietary formulation coats leaves and sticks to the surface, making nutrients available longer

### Effectiveness

- Builds strong, healthy and vibrant plants and turf
- Enhances root mass and growth
- Helps turf and plants better withstand stress
- Delivers consistent results

### Easy to Use

- Ready-to-use liquid formulation
- Compatible with most fungicides, insecticides and PGR's
- May applied using ground equipment, through fertigation or as a soil drench

Small particle size and low molecular weight allow nutrients to move to plant growth points quickly.

### Guaranteed Analysis

Total Nitrogen (N) .....	5.0%
5.0% Urea nitrogen	
Iron (Fe) .....	5.0%
5.0% Water soluble iron	

Derived from potassium carbonate

F76

## Application and Use

MANNI-PLEX® should be applied to actively growing plants and turf throughout the year. For best results apply early morning or late evening.

**Ornamental Crops:** Apply 1-2 quarts per 100 gallons water. Cover foliage thoroughly to point of runoff.

### Turf (Commercial):

Green & Tees: 2-5 fl oz per 1,000 sq ft.  
 Fairways & Sports Turf: 2.5-6.5 quarts per acre.  
 Overseeding: 2 fl oz per 1,000 sq ft after germination.  
 Sod Installation: 2 fl oz per 1,000 sq ft at installation.

For more information, see BRANDT's Summer/Winter Success Spray programs. Always read full label before use.
