LibertyLink GT27 is not tolerant to all HPPD herbicides. Alite 27 herbicide is the first and only HPPD labeled for use with LibertyLink GT27 soybeans. Alite 27 herbicide is a U.S. EPA Restricted Use Pesticide. Always read and follow label directions.

Seeds containing the LibertyLink trait may be protected under one or more U.S. patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a BASF Grower Technology Agreement.

It is illegal to save seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed. LibertyLink GT27 soybeans offer triple stack tolerance to Liberty, glyphosate, and Alite 27.
