

Brandt® Mag Nitrate

Nutrient Solution

7-0-0

Guaranteed Analysis

Total Nitrogen (N)	7.0%
7.0% Nitrate nitrogen	
Magnesium (Mg)	6.0%
6.0% Water soluble magnesium	

Derived from magnesium nitrate.

F76

General Information

BRANDT MAG NITRATE is recommended to prevent and correct magnesium deficiency of field, row, vegetable, fruit, tree, and vine crops. Applied alone, with pesticides, or with other fertilizers, this product may be applied directly to the soil or to the foliage of growing crops via ground sprayers, aircraft or fertigation systems.

Rate Recommendations

FOLIAR APPLICATION: Actively growing plants with young leaves absorb foliarly applied BRANDT MAG NITRATE most efficiently. Immediate post-irrigation or post-rainfall application will enhance foliar uptake, as will addition of urea (for example, 5 lbs. Lo-Bi Urea per 100 gallons of spray solution). Thorough coverage and wetting are needed for optimum foliar spray results.

AVOID foliar applications of this product when plants are under moisture stress. AVOID foliar applications to deciduous tree crops during bloom.

Dilute Applications: Apply 1-4 quarts in 50 gallons of water or more per acre.

Concentrate Applications: Use up to 2 quarts in a minimum of 25 gallons of water per acre.

Aerial Applications: Up to 1 quart per 5 gallons of spray may be used, but more dilute solutions will improve coverage and results.

SOIL APPLICATION: The lower rates are for field, row and vegetable crops. The higher rates are for fruit, tree and vine. Recommended with nitrogen fertilizer solutions.

Soil Fertility Maintenance	1-3 qts./acre
Mild Deficiency	2-6 qts./acre
Severe Deficiency	1-3 gals./acre

Net Contents: 2.5 gallons (9.46 liters)

Density: 11.2 lb/gal @ 68°F

Net Weight: 27.7 lb (12.5 kg)

Packaged: 2 x 2.5 gallons (9.46 liters)

32034BRN100

2016-08 (GHS)

Fertigation: Apply the recommended amount of product in split applications 1-2 weeks apart throughout the growing season.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil or plant tissue test recommendation to monitor specific levels of micronutrients and maintain these levels for optimum plant growth.

Mixing and Handling Instructions

Shake, stir, or swirl contents before using. Put 1/3 to 2/3 of total required water volume in tank. Add recommended amount of this product before adding pesticides, adjuvants, or other fertilizers. Agitate until thoroughly mixed, then fill tank with remainder of water.

BRANDT MAG NITRATE is compatible with most pesticides and fertilizers. However, if the desired combination has not been previously used, check for chemical mixture compatibility using a jar test prior to application. Be cautious when mixing with phosphate solutions and ammoniated fertilizers.

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.

Warranty: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
