# Manni-Plex<sup>®</sup> Ni

### Foliar Nickel Solution

## **Guaranteed Analysis**

Total Nitrogen (N)	)%
2.0% Nitrate nitrogen	
5.0% Urea nitrogen	
Nickel (Ni)	)%
5.0% Water soluble nickel	

Derived from nickel nitrate and urea.

F76

#### **General Information**

MANNI-PLEX Ni is designed for application to all field, row, vegetable, fruit, tree and vine crops, and ornamentals for the prevention and correction of nickel deficiency when used as part of a balanced fertility program.

#### Rate Recommendations

**Field, Row, Vegetable, Fruit, Tree and Vine Crops:** Apply 8-16 fl oz per acre per application throughout the growing season. At least 3 applications are recommended. More frequent applications at 8 fl oz per acre may be needed to correct deficiencies once they occur.

**Ornamental Crops:** Apply 8-16 fl oz per 100 gallons water. Cover foliage thoroughly to point of runoff.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil test or plant analysis recommendation.

## **Mixing and Handling Instructions**

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

ATTENTION: Some crops may be injured by the application of nickel. Do not exceed maximum recommended rate.
