Derived from copper EDTA, iron EDTA, manganese EDTA, and zinc EDTA. F76

General Information

BRANDT SEQUESTAR RMX-8 is recommended for crops such as alfalfa, almonds, avocados, apples, broccoli, cabbage, cauliflower, carrots, celery, citrus, corn, grapes, lettuce, milo, melons, nectarines, peaches, pears, pecans, peppers, plums, prunes, potatoes, sorghum, sugar beets, sweet corn, sugar cane, strawberries, tomatoes, turnips, walnuts, watermelons, wheat and most other crops.

This product gives best results when crops have adequate supplies of water and major nutrients, and are not under stress for other reasons. Conditions which are responsible for one particular deficiency can also induce deficiencies of other trace elements.

Directions For Use

Mixing: BRANDT SEQUESTAR RMX-8 is soluble in water. This product should be added slowly to the main bulk of the water while it is being agitated. Agitation should continue for a minute or two after the addition of this product. If pesticides are to be used with the spray mix, add them after the BRANDT SEQUESTAR RMX-8 has dissolved.

Compatibility: If the desired combination of fertilizers or pesticides has not been previously used, a compatibility test is recommended.

Soil Application: BRANDT SEQUESTAR RMX-8 is recommended for use on all types of soils. To ensure uniform coverage, this product should be dissolved in water or fluid fertilizer, or dry blended with water soluble fertilizers for band, sidedress, or broadcast applications. Soil applications may also be made by dissolving in water and then mixing or metering into drip, sprinkler or furrow irrigation systems.

Fruit Trees:	1 or 2 lb per tree.
Vines:	0.5 to 1 lb per 100 feet of vine row.
Field Crops:	Up to 15 lb per acre.
Row Crops:	Up to 15 lb per acre.

The rates given in the table above are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

Net Weight: 40 lb / 18.1 kg

LOT #

Aerial Application: Apply 1/3 lb of BRANDT SEQUESTAR RMX-8 per acre in at least 10 gal of water. For application timing and frequency, refer to appropriate foliar application recommendation.

Foliar Application: Foliar sprays of BRANDT SEQUESTAR RMX-8 are intended to complement good soil fertility programs by supplying nutrients directly to the foliage of crops during critical growth stages. Foliar soluble sprays may improve absorption and efficiency of micronutrient uptake. For maximum effect from any foliar spray, apply during morning or late evening, not in bright sunshine.

Fruit Trees:	0.5 to 1 lb per acre.
Vegetables:	0.5 to 1 lb per acre.
Row Crops:	0.5 to 1 pound per acre.
Ornamentals:	1 tsp per gallon of water every 2 to 4 weeks. Use enough solution to cover thoroughly or approximately 1 gal per 10 sq ft. This product can be incorporated into NPK fertilizer at 4 oz per 50 lb of NPK.

Multiple chelate applications should be made at no less than 10 to 14 day intervals to reduce the potential for crop injury.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Information about the components of this lot of fertilizer may be obtained by writing to Brandt Consolidated, Inc. and giving the lot number which is found on the container or label.

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
